The plan

AI read 32 items, 1 corrected by you, 0 added by you

People

Joel is available from 09:00 until 10:30. · L3 · confirmed

Joel can drive. · L3 · confirmed

Joel, Maya and Sam hold loading-area keys. · L3 · changed by Fix 2

Ravi is available from 09:00 until 13:00. · L8 · confirmed

Ravi can drive. · L8 · confirmed

Ravi does not hold a loading-area key. · L8 · confirmed

Maya is available from 09:00 until 10:45. · L8 · confirmed

Maya can drive. · L8 · confirmed

Maya holds a loading-area key. · L8 · changed by Fix 2

Sam is available from 09:00 until 12:00. · L9 · confirmed

Sam can drive. · L9 · confirmed

Sam holds a loading-area key. · L9 · changed by Fix 2

Anita is available from 09:00 until 12:00. · L9 · confirmed

Anita can drive. · L9 · confirmed

Anita does not hold a loading-area key. · L9 · confirmed

Vehicles

Van is available from 09:30. · L5 · confirmed

Car is available from 09:00. · L5 · confirmed

Loading bay opens at 09:00 and needs a key. · L3 · confirmed

Only one vehicle can load at a time. · L3 · confirmed

Routes

Route A serves 10 households by Car; Ravi drives, with Maya, Joel and Sam as backups. Loading cover: Joel, Anita, Maya and Ravi. · L8 · changed by Fix 3

Route A's loading takes 10 minutes. · L8 · confirmed

Route A's drive takes 60 minutes. · L8 · confirmed

Route B serves 12 households by Van; Sam drives, with Anita and Ravi as backups. Loading cover: Joel, Anita and Maya. · L9 · confirmed

Route B's loading takes 10 minutes. · L9 · confirmed

Route B's drive takes 35 minutes. · L9 · confirmed

Route C serves 8 households by Van; Anita drives, with Sam and Ravi as backups. Loading cover: Joel, Anita, Maya and Sam. · L10 · changed by Fix 1

Route C's loading takes 10 minutes. · L10 · confirmed

Route C's drive takes 60 minutes. · L10 · confirmed

Times

Supply truck arrives at 09:00. · L4 · confirmed

Everything must be delivered by 12:00. · L6 · confirmed

Review decisions

- What time does Ravi arrive? **Use the reviewed details**
- What time does Maya arrive? **Use the reviewed details**
- What time does Sam arrive? **Use the reviewed details**
- What time does Anita arrive? **Use the reviewed details**
- Hall has no loading activity or supply arrival listed. Is it separate, or the same place as another listing? **Hall is the same place as Loading bay. Use Loading bay's reviewed details.**

What was tested

100 tests: every single problem and every pair that can happen

14 problems, at the sizes confirmed below.

Problem	Size tested
Ravi absent	Absent (no duration)
Joel absent	Absent (no duration)
Anita absent	Absent (no duration)
Maya absent	Absent (no duration)
Sam absent	Absent (no duration)
Ravi leaves 90 min early	90 minutes
Joel leaves 90 min early	90 minutes
Anita leaves 90 min early	90 minutes
Maya leaves 90 min early	90 minutes
Sam leaves 90 min early	90 minutes
Van back 30 min late	30 minutes
Car back 30 min late	30 minutes
Supply truck 45 min late	45 minutes
Loading bay blocked 30 min	30 minutes

What broke before fixes

`100 tests: 1 single weak spot, 3 hidden pairs, 12 already broken by the weak spot, 84 survived.`

> ✕ **Joel absent**
>
> Single weak spot
>
> Routes A, B, C: 30 households not delivered. Nobody can open the loading area

> ✕ **Ravi absent + Supply truck 45 min late**
>
> Hidden pair: each problem alone survived
>
> Route A: 10 households not delivered

> ✕ **Anita absent + Van back 30 min late**
>
> Hidden pair: each problem alone survived
>
> Route C: 8 households not delivered

> ✕ **Anita leaves 90 min early + Van back 30 min late**
>
> Hidden pair: each problem alone survived
>
> Route C: 8 households not delivered

12 pairs already broken by Joel absent alone

Fixes

Accepted changes

✓ **Fix 1 (AI): Add an extra loader (Sam) to Route C so loading can finish after the original loaders leave.**

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

- Route C: add loader cover: Sam.

`fixes 2 · still broken 2 · new crosses 0`

✓ **Fix 2 (yours): Spare key for Maya; Spare key for Sam.**

Your change

- Give Maya a spare loading-area key; existing holders keep theirs.
- Give Sam a spare loading-area key; existing holders keep theirs.

`fixes 1 · still broken 1 · new crosses 0`

✓ **Fix 3 (yours): Sam backs up Route A.**

Your change

- Route A: add driver cover: Sam.

`fixes 1 · still broken 0 · new crosses 0`

Turned-down and couldn't-apply suggestions

These are the changes requested and checked during this run. Scores use the plan at that point.

Case: Anita leaves 90 min early + Van back 30 min late

Extend Anita's availability so she can stay for the loading of Route C.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. This change sets Anita's finish to 11:00, earlier than their planned 12:00. The operation shortens their hours; the selected case still fails.

`fixes 0 · still broken 4 · new crosses 2`

Case: Anita leaves 90 min early + Van back 30 min late

Add Ravi as an additional driver for Route C so the route can be driven even if Anita departs early.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Ravi is already a driver for Route C. Van back 10:45. Loading team gone.

`fixes 0 · still broken 4 · new crosses 0`

Case: Anita leaves 90 min early + Van back 30 min late

Assign the Car to Route C (instead of the Van) and give the Van to Route B, avoiding the late-return conflict.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Fixes 3 crosses but makes 'Supply truck 45 min late' a new single weak spot.

`fixes 3 · still broken 1 · new crosses 1`

Case: Anita absent + Van back 30 min late

Replace Anita with available drivers for Route C.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Creates a new hidden pair: Ravi absent + Sam absent.

`fixes 0 · still broken 4 · new crosses 2`

Case: Anita absent + Van back 30 min late

Assign the van to Route C earlier and use the car for Route B, preventing the van’s late return from blocking Route C.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Couldn't apply. Unknown target id 'vehicle-van' in fix move_route.

Not scored. The operation did not pass the gate.

Case: Joel absent

Give a spare key to another volunteer so the loading bay can be opened.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Creates a new hidden pair: Joel absent + Ravi absent.

`fixes 1 · still broken 1 · new crosses 1`

Case: Joel absent

Replace Joel as a driver on Route A with another available driver.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Creates a new hidden pair: Ravi absent + Maya absent.

`fixes 0 · still broken 2 · new crosses 2`

Case: Joel absent

Replace Joel as a loader on all routes with another available loader.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Creates a new hidden pair: Anita absent + Van back 30 min late.

`fixes 0 · still broken 2 · new crosses 4`

Case: Ravi absent + Supply truck 45 min late

Replace absent driver Ravi with an available driver for Route A.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Creates a new hidden pair: Anita absent + Supply truck 45 min late.

`fixes 1 · still broken 0 · new crosses 4`

Case: Ravi absent + Supply truck 45 min late

Give Anita a spare key so she can load the supply truck at the loading bay.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Car free 9:00. Supply truck arrives 9:45.

`fixes 0 · still broken 1 · new crosses 0`

Case: Ravi absent + Supply truck 45 min late

Add an extra loader (Sam) to Route A to ensure loading can start promptly when the supply truck arrives.

Suggested by Groq / openai/gpt-oss-120b (fallback: Gemini unavailable)

Turned down. Route A still is not delivered. Drivers for Route A: Ravi absent, Maya available until 10:45, Joel available until 10:30.

`fixes 0 · still broken 1 · new crosses 0`

After the fixes

`100 tests: 0 single weak spots, 0 hidden pairs, 0 already broken by a weak spot, 100 survived.`

✓ All 100 tested scenarios survive.

Survived means survived the listed problems at the listed sizes. It is not a guarantee.

What was NOT tested

- Three or more problems at once.
- Problem types outside the list: bad weather, someone getting sick partway through, wrong addresses, running short of food, volunteers arriving late.
- Other sizes of the same problems. Only the sizes listed above were tested.
- Anything the plan did not mention.

Question-mark results

No question-mark results in the original or current run.
